Unite[SE] eight person double bench with full width acrylic screens
Faveo task seating

Unite[SE] Workstations

Unite[SE] is a comprehensive bench, desk and table programme which combines simple clean design with a highly robust and flexible construction. The understructure provides a sturdy modular platform for the addition of multiple worksurface and screen options either from its standard programme or as an exercise in custom design. The programme offers, benching, freestanding desks, tables and a cellular office workstation / work wall application.

Standard Goalpost leg

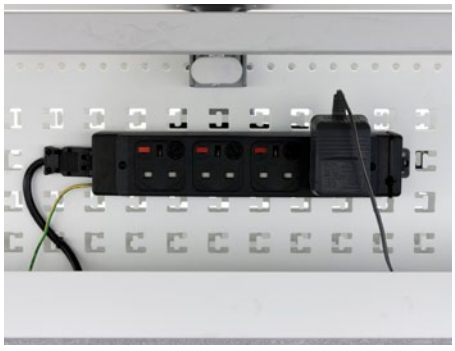
Hoop leg option

Unite[SE] 120 degree workstation clusters, inset acrylic screens with wrap-around worktops
Faveo task seating

Slatwall mounted screen arm

Understructure mounted screen arm

Worktop mounted screen arm



Comprehensive cable management options

Wrap-around tops

End of bench meeting extensions

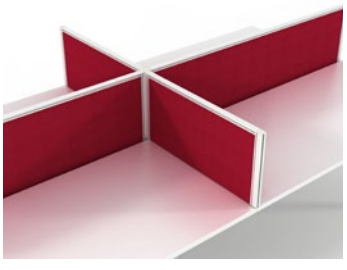
Unite^{SE} Screen Options

The Unite^{SE} workstation range includes a wide variety of screen options for aesthetic and practical applications. Simple fabric panels, full and partial metal frame surrounds, simple fabric wrap, slatwalls and toolrails to secure monitor arms, perspex panels and slot-in blades.

Screens can also be raised above worksurface level or inset from the worksurface length. Side return and floor standing screens are integrated into the range.

Floor standing screens



Side return screens

Acrylic panels

Loop, wrap-around screen frame

Screen mounted power & data sockets

Screen mounted accessories

Unite^{SE} Workwall

Unite^{SE} Workwall provides a seamless continuity of workstation design and performance from open plan into the cellular environment.

The introduction of alternative worksurface and fabric finishes is made simple by the intelligent, flexible design of the Unite^{SE} workstation platform and KI's renowned willingness and ability to provide tailored designs for its customers.

Unite^{SE} Storage

Unite^{SE} Storage from KI is a game changer. Storage has to date been designed somewhat in isolation from its main partner in the office, the workstation, with the main focus being on document and media storage. No more.

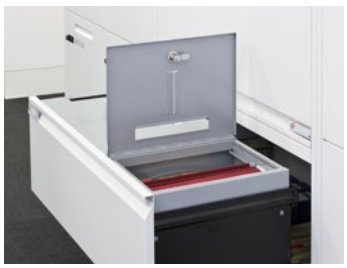
The brand new Unite^{SE} storage programme is a fresh and forward looking programme designed to offer innovative and unique solutions to personal storage below desk screen height, built on the successful design and engineering platforms of KI's proven systems.

How people work has changed rapidly in a very short period of time. Flexible working is driving an exciting new evolution in storage design where personal keyless storage solutions must dovetail seamlessly with more traditional document management as the pace of workplace change increases and diversifies.

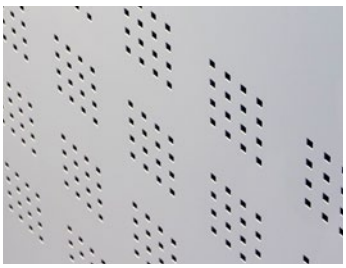
Unite^{SE} sliding door storage.

Keyless locking for drawer units, cupboards and pedestals.

Keyless locks, name tag holders and post slot options for locker doors.



KI SmartLocker.



Perforated panel options available.

HotBox mobile personal storage box.

SmartBox with vertical and horizontal pentrays.

Unite[SE] SpaceStation

The requirements for personal storage at the workstation are changing and increasingly the demands placed on traditional mobile pedestals challenge their effectiveness.

SpaceStation is a revolutionary new design which provides a multitude of secure flexible mobile storage options addressing these evolving changes. The simple clean aesthetic and cost effectiveness of SpaceStation brings a completely new option into the workplace design mix.

Unite[SE] cluster with full width acrylic screens
Unite[SE] storage units 1114mm & 715mm high (740mm high with MFC top)
Desktop & mobile SpaceStation units
Faveo task seating

Rapid, simple assembly

At the core of the intelligent and robust design of Unite^{SE} workstations is a low yet highly flexible inventory.

The understructure, built from rigid box section powder coated steel, is assembled first. Screens, cable management, CPU holders and monitor arms are then added, enabling IT and Electrical works to be easily accessible before the worksurfaces and accessories are fitted.

High quality mechanical fixings within every element of the structure, guarantee the strength and stability of the furniture throughout the life of the product.

Cable Management

Vertical cable access is either via an easily accessible conduit within the intermediate leg frame, or through flexible plastic umbilical risers which can be fitted to any point along the horizontal cable management. There is a shallow horizontal cable tray or the option of a deep vertical cable tie tray, both of which are easily accessible and interchangeable.

A sliding top option offers instant access to the horizontal cable tray where there is generous space for power and data outlets and transformers. Monitor arms and power/data outlets can be fixed to either the steel understructure or the bottom frame of the desk screen by means of specially designed mounting brackets.

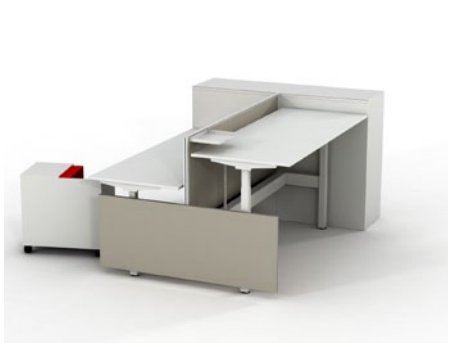
Height Adjustability

Unite^{SE} is available with a range of height adjustability options to meet stringent EU regulations. Pin, crank and electric adjustment with ranges varying from 620mm through to 1280mm for sit-to-stand functionality.



Individual worksurfaces within a multiple position bench structure can be raised in height by 80mm (finished worksurface height 820mm) in 20mm increments by means of a simple pin height rail adaptor bracket.

The rail adaptor bracket can be specified at the manufacturing stage, or easily installed at any time in the future. The design of the components means that the adjoining workstations do not need to be dismantled during a retrofit. The workstation can be easily reset to standard height if required.

Value and Service

KI (UK) Ltd is a wholly owned subsidiary of KI Inc. (Krueger International) which was founded in 1941 and is one of the world's largest independent furniture manufacturing groups employing over 3,500 people. KI produces high quality, durable furniture bringing together good design, advanced engineering and sustainable resources. KI is a recognised leader in the Business, Education, Healthcare and Government sectors.

KI's European headquarters is located at its central London showroom and operations centre. Warehousing and logistics are controlled from the company's 60,000 sq ft facility in the South East of England with further regional dealer partners, distribution and service facilities across the UK and Europe. KI's service platform is built around established principals of reliability and flexibility delivered in a personable, approachable manner ensuring customers believe that KI is good to do business with and represents a safe pair of hands.

KI's extensive European product portfolios are designed locally and manufactured in factories across the UK and Continental Europe. KI's core design principles have evolved from listening to its customers. This ensures that KI develops products that are flexible, sustainable and relevant in today's workplace and which offer great value.

KI & The Environment

KI is committed to being environmentally conscious and striving to ensure the continued availability of natural resources for current and future generations. As part of this mission, we recognise our responsibility to protect human health, the environment, and natural resources, and to continually strive to improve the environmental quality of our operations. To carry out this commitment, it is our policy to:

- *Meet or exceed the requirements of all environmental laws and regulations applicable to our operations.*
- *Limit our impact on the environment to the extent practicable and work to reduce recognised environmental risks to our employees and the communities in which we operate by employing safe technologies and operating procedures.*
- *Continually assess our environmental programs and monitor our environmental performance.*
- *Have operating policies and programmes in place to implement our Environmental Quality Policy.*

As an ISO14001 accredited company KI believes that it can provide best value to its customers and minimise its environmental impact by producing furniture that will be utilised for many decades using environmentally sound processes. With Warranties which include 25-Year and Lifetime periods, we demonstrate our commitment to manufacturing durable products.

Reduce, Reuse, Recycle

All of KI's facilities embrace the theme of "REDUCE, REUSE, RECYCLE" in their operations. These efforts are aimed at all media - water usage, wastewater discharges, air emissions, and solid/hazardous waste - in a comprehensive effort towards pollution prevention.

For full details of KI's environmental policies see "KI's Environmental Management programme" on our website: *www.kieurope.com/environment.asp*
